Description

The only known model, and not listed, this large cache pot is exceptional in the production of Montières by its design in very high relief.

Three arums, stems and flowers, stand out and enclose the body of the planter-shaped flask of cone flared.

Other arums and dense foliage almost completely cover the surface. A black circle delimits the edge of the top of the vase separating the matt earth floor from the shiny enamel decoration of the interior. Signature "Montières" black enamelled down on one side, traces of old labels underneath. A cache-pot with arums, close to ours, although without high relief, appears in the work of Mr. Pierre Monier dedicated to his grandfather Charles Adzir TROUILLOT who would probably have modeled for the pottery of Saint Clement in

Lunéville (see reproduction). Charles Adzir
TROUILLOT (1869 - 1953) modeler, sculptor,
ceramist, an artist whose name is found on the
first letterhead of ceramic Montières in Amiens.
The link with our model is therefore more than
likely.

It is in a good state of conservation (tiny
égrenures under a petal of arum, as well as two
others and a brightness barely visible on two
interiors of stems). Preserved since in the family
of one of the decorators of the time.

Made in Amiens between 1917 and 1919
