

Miniature : Workbenches And Cabinetmakers Tools

1 200 EUR

Period : 19th century

Condition : Très bon état

Material : Solid wood

Length : 32 cm

Height : 13,5 cm

Description

Probably the only piece of mastery that includes the workbench with its vise and valet, a slat, a half-slat, a plane, a chisel, a mallet and a square. Each of these pieces being made with great precision to the exact same of the originals. The different planes include their iron, counter-iron, adjusting screw, corner and light. Even the vise screw on the workbench has its own system for shifting the shaft so that it stays parallel to the workpieces. Real little jewels! The wood used is essentially pear.
