Description

Pair of andirons with salamander and phoenix Charles Cressent from the first quarter of the 18th century A bronze patina medal of non-gilded origin that is often found in gilding Probably a special order For information I am selling its natural andirons in their juices . (They are at a period they were probably dismantled for cleaning the busts of children were reassembled upside down on the two andirons we can see this assembly error on the photos) As the screws are old and oxidized I can not be reassembled at the origin it will be necessary to reverse them The screws and bolts are well 18th century I guarantee 18th century first quarter of the 18th century. We have made a choice to put on sale without touching it the customer will take care of reassembling them Height of the phoenix 33.5 cm
