Description

Rare and beautiful lamp in the shape of a kiosk and decorated with four female figures in the antique taste, symbolizing the Arts (sculpture, literature and music). The structure of the lamp (kiosk) is in brass and lacquered and gilded metal, the four female figures are in polychrome biscuit. The lighting of the lamp is done by the "ceiling" of the kiosk. The electrification is working. Very beautiful object really atypical and extremely decorative, this luminaire is as beautiful off as it is on. The set is in good house condition, the biscuit figures are in good condition, only a few small chips of paint are visible here and there on the kiosk (visible on photos: see base and above)
