Description

Charming round brooch with flower basket on a black background from the late 19th century.

Silver surround garnished with a frieze of faceted steel beads. Main decoration of a bouquet of flowers in a basketry surmounted by a ribbon bow, composed of faceted steel beads set in a setting probably in silver. This decoration is set on a black enamelled metal background

(micro-chips on the edge of the enamel, see photos). The back bears the original brooch, we can guess the following hollow marks:
STERLING SILVER and MADE IN FRANCE.

The qualification: "made in" was born in England at the end of the 19th century. Note: the remarkable shine of the steel facets. Free delivery for metropolitan France.
