## Wrought Iron And Stained Glass Lantern

430 EUR

Period : 19th century

Condition : Bon état

Material : Wrought iron

Diameter : 42 cm

Height : 88 cm

### Description

Hexagonal lantern in black patinated wrought iron, with a red and orange stained glass window on each side.

Note two faults, an accident is present on two stained glass windows (see photos), but this does not prevent the solidity of the whole, and is not very visible once the lantern is suspended.

One of the cut sides opens like a door to allow the bulb to be changed or the stained glass windows to be taken out.

French work late 19th, early 20th, electrified by our workshop.

All our lights are fully restored by our workshop, both in terms of structure and electricity and are therefore in perfect condition of presentation and operation.
