Description

Extremely rare conscript gourd in fine earthenware from Gien, for Soldier "H.A" of the 1887 class.

Rare because these gourds were produced only for the workers of the factory doing their service. It is therefore a small production.

Dragon sets in drunk and in gallant company, accompanied by proverbs. Maybe Private H.A was in this weapon.

In addition, the use of gold (24 carats) on fine earthenware is rather rare.
