New Eiffel Tower Construction Circa 1889

1 450 EUR

Period : 19th century

Condition : Très bon état

Material : Cardboard

Description

THE EIFFEL TOWER - NEW

CONSTRUCTION for children Universal

Exhibition of 1889 Exceptional architecture game representing the Eiffel Tower dating from the time of its construction. The pieces are made of embossed cardboard and wood. The game is almost complete with all these parts and in superb condition. 2 small easy-to-remake side panels are missing and 1 door from the 2nd floor, which is more annoying may remain unimportant given the rarity of this construction set, especially in its original box and with its instructions for use. This is the second and largest size of this game. I had never seen it in 40 years in the business. The small size is 80 cm high, it is 111 cm at the top of the tower and 127 cm at the top of the flag. Once mounted the tower is more than 110 cm high Box
