

## Bicolor Gold Bracelet

1 950 EUR

Period : 20th century

Condition : Parfait état

Material : Gold

Length : 18 cm

### Description

A two-tone bracelet means that it is made of two different colors of gold. For example, it could be a bracelet with yellow gold links or designs combined with white or rose gold elements. This gives the bracelet an elegant and versatile look, as it can easily be combined with other jewelry pieces of different gold colors. The gold weight of 19.0 grams is a measure of the pure gold content in the bracelet. To determine the actual price of the jewelry, several factors must be considered, such as the gold price at the time of purchase, manufacturing costs, the brand, and the quality of the jewelry. It is recommended to purchase gold jewelry from trusted jewelers, as they will be able to provide you with detailed information about the bracelet, its gold weight, karat, and value.
