Description

Beautiful Tripod Pedestal Table with fluted barrels and tilting top in solid mahogany from Cuba. Beautiful model very close to the productions of Joseph Canabas (received master cabinetmaker on April 1, 1766). The whole has been the subject of a complete restoration campaign, all the original elements have been preserved, only the varnish with the buffer has been redone. Perfect working order and above all very stable, to note: a small graft of solid mahogany on the plate. Beautiful piece of decoration, ideal to complete a set of Louis XVI period, but also to present a collection such as: miniatures, silverware, porcelain or between two armchairs with a pretty lamp.
