Large Oval Cooler In Plated E18th Century

3 600 EUR

Period : 18th century

Condition : Bel état

Length : 47

Width : 20

Height : 35

Description

The coolers were placed on a console along the wall of the reception hall, because until the end of the 18th century it was not customary to have glasses at the table.

Glass coolers prevent a sudden temperature change between glass and wine. The host took care, before serving the chilled wines to the guests, to refresh the glasses before serving.
