

Navy Cannon Model Coming From A Collection

130 EUR

Period : 19th century

Condition : Bon état

Length : 13.4 cm

Description

It is a canon model, which comes from a collection, mainly of Marine cannons , which all together have one particularity in common: They were designed to be able to fire really !

The collector belonged to an association of artillery enthusiasts who liked to "make talk" their model cannons.

The tube is in bronze, it takes the shape of the massive 30-pound marine cannon (1820-1840) which was used to defend the fortresses of the coast.

Of course, the light in the chamber is pierced.

Tube length 10.7 cm, caliber = about 8 mm

The cannon is connected to the wood by two iron brackets.

The carriage is made of solid wood.

Nice little piece of Navy artillery
