Width : 119cm

Height : 155cm

Depth : 48cm

Description

Haute époque, circa 1590, exceptionnel Walnut carved Dresser

2nd Renaissance period

If this ceremonial stuff design and construction clearly refer to architectural language (front with 3 parts, the 2 laterals narrower and recessed - allowing to create a discreet perspective and depth game, punctuated by 4 columns surrounded by Corinthian capitals), this influence is further reinforced by the very rich carved decoration of this dresser.

All the elements of sculptures, panels, columns, fittings (latches of the side doors, lock and key of the central door, pendants of the 3 chiseled iron drawers) are fully original and genuine.
