with apples, pears and grapes, surrounded by daffodils and roses whose foliage is made of wood tinted in water green color. The basket is held in suspension with a link whose end has a Louis XVI knot. In the lower part, the facade is enriched with an important horizontal motif representing delicately sculpted gilt bronze foliage. At the corners, this refined chest of drawers has two feet embellished with a sticker in relief followed by a fall and ending in a clog. The set is in finely chiseled gilt bronze. The sides of this transitional style piece of furniture are convex in shape and benefit from marquetry identical to that of the front as well as rear legs ending in a small shoe. This elegant chest of drawers, whose varnished finish with a mirror effect, will invite itself into an interior where the beauty of its marquetry will be noticed.
