Description

Large Turned Exotic Wood Ship's Bar, whose strapping is in Brass. This essential element for each Boat is made up of 5 wooden elements, 10 cut-out wooden spokes and the same number of Sleeves, used to maneuver. In the center, a brass element covers the Hub. On the other side of the Bar, the appearance is similar to the front, we can still see said Cast Iron hub, with its hole used to insert the axle, called "drive square", which is used to make the link between the Helm and the Rudder. This prestigious decorative element only aspires to make you travel, as it once did on the seas around the world.

Period: Early 20th century
