

Curious Souvenir Of 1990 Maiden Flight Chinese Rocket Lm-2e

65 EUR

Period : 20th century

Condition : Bon état

Material : Brass

Description

The Long March 2E, also known as Chang Zheng 2E, CZ-2E, and LM-2E, was a Chinese three-stage carrier orbital carrier rocket designed to launch commercial communications satellites into orbit. The Long March 2E made its maiden flight on July 16, 1990. However, the rocket had compatibility flaws with American-made satellites that caused a launch failure and a partial failure in just 7 missions. The rocket was retired on December 28, 1995 in favor of the Long March 3B. So that's the memory..... of a failure.
