

Spheric Burning Mirror

900 EUR

Signature : Non signé

Period : 19th century

Condition : Très bon état

Material : Brass

Description

This concave mirror concentrates the received beam of light at a point by reflection. Optical instrument used in physics cabinets. The best-known experiment consisted in placing it in front of a light source and directing the beam it reflects towards a target to be ignited. It can also be used in pairs, without light source.

Nice model.
