Description

Pretty and fine cut with golden roses by Saint_Louis. Typical piece from the Saint-Louis crystal factory with this decoration of floral friezes engraved on the wheel under the cup and finely gilded with agate stone. The rendering is very pretty, these friezes are associated with a fine raspberry geometric decoration, itself also enhanced with gold. We are really in the Napoleon 3-restoration spirit. Beautiful fineness, 27 cm in diameter, a little wear to the gilding (completely normal given the age of the piece). Very beautiful old piece, rare.
