# Butterfly Shaped Electric Heater

750 EUR

Period : 20th century

Condition : Bon état

Height : 70 cm

## Description

Fun and very interesting radiator in aluminum and cast aluminum from the 40s/50s. The resistances are located in the body of the butterfly, while the wings which serve as deflectors are adjustable in inclination. The butterfly is placed on a "log" which is also in painted metal. The set is in good condition. I didn't plug it in, I don't know if it works because I didn't check if it was 110 or 220 volts.
Height 70cm. Width 86cm. Log 50 cm.
